

CRAIG BRYAN: Good morning. My name is Craig Bryan. I am with Canyon Fuel, Levan load out facility in Juab County. I know you heard remarks of Sevier County, Carbon County, but it affects Juab County also. We are a coal out facility. We have eight or nine full-time people there. Even though we are few in numbers, we accomplish a lot there. We work a lot on the rail, and we talk about the jobs and the ripple effect it will have not just on the miner, not on the trucking company, but do with a lot of work with the Union Pacific Railroad. I was talking to a guy the other day that the decline in coal sales that they've just put another 4500 people on the unemployment list because of it. So I do support our Governor and our representative in the remarks they made. We take a lot of pride in what we do there. It's great to have an area where we can work, an area that we was raised. I know a lot of us feel that way. I'm hoping that my family can continue to find a job and have a job there and be able to raise their families there too. We love the outdoors just as much as anybody, and we care a lot about it, and we protect them. I'm just grateful for the opportunity I have to stand and say a few things about this. If we could just take in consideration what goes in to what mines the coal and the things we're doing to better ourselves and better the surroundings around us. Like I said, we care just as much as for our surroundings as anybody does, and I hope you make it point that you can travel down and visit some of these locations and actually get first view site of some of these locations and thank you.
